

Iyan Barry

CIO · Technology leader · Speaker

Brisbane, Australia

I speak about the decisions technology leaders have to make: where AI is useful, what to build, how to prioritise security, and how to give teams room to deliver. Practical conversations about technology, people and trade-offs — without the sales pitch.

01 / TOPICS & AUDIENCE TAKEAWAYS

01 **Making practical AI decisions**

[CIOs, boards and executive teams](#)

A set of questions to test an AI proposal, define success and decide whether to proceed, redesign or stop.

02 **Building internal platforms that people use**

[Technology leaders, product and operations teams](#)

A way to scope a first release, assign an owner and plan for adoption, support and maintenance beyond the demo.

03 **Cybersecurity on a realistic budget**

[CIOs, IT managers and boards](#)

A method for ranking security work by risk and effort, and explaining priorities and residual risk to the board.

04 **Leading teams beyond firefighting**

[IT leaders and executive teams](#)

A way to separate operational demand from improvement work, clarify decision rights and spot leadership bottlenecks.

05 **Connecting data, systems and decisions**

[Technology, data and business leaders](#)

A practical approach to mapping a data flow, identifying its owner and prioritising integrations around a business decision.

06 **Running technology across jurisdictions**

[Executives and technology teams operating internationally](#)

A checklist for separating shared controls from local requirements and identifying where specialist legal or regulatory advice is needed.

Bios & booking

ONE LINE

Iyan Barry is a Brisbane-based CIO who works across technology leadership, cybersecurity, data, AI and automation.

SHORT BIO

Iyan Barry is Chief Information Officer at Safe Places for Children, leading technology, data and cybersecurity across Australian and UK operations. His career spans three decades across APAC, ANZ and the UK. He combines technology leadership with hands-on work in AI and automation, and speaks about what it takes to make technology useful in practice. He was a panellist at iTnews State of Data & AI in Sydney.

FULL BIO

Iyan Barry is Chief Information Officer at Safe Places for Children, where he leads technology, data, cybersecurity and digital strategy across Australian and UK operations. He has spent three decades in technology, with experience across APAC, ANZ and the UK. His work includes developing IT teams, improving security, connecting systems and putting AI and automation to use. He has worked with the ACSC Essential Eight and ISO 27001-aligned controls, and is familiar with SMB1001 and ISO 27032. Alongside his executive role, he helps organisations with technology decisions and hands-on projects. He spoke on the “Scaling AI” panel alongside Workato and Tyro Payments at iTnews State of Data & AI in Sydney, and writes about technology leadership at iyanbarry.com.
